1. To create a custom quiz assignment, click the **Create Quiz Assignment** button located at the top of the home page or the top of the Assignments page.

2. On the next page, give the assignment a name, and choose the course in which this assignment will appear.
3. Next, select **Custom** Assignment from the options provided and select Next.

4. By default, the assignment will be released to all students in the course selected, however, you can choose for only individual students to receive this quiz.

5. If you have access to multiple question sets, you can choose them from the drop down at the top of the page. You can also choose the topic you would like to test on under Topic Organization. **Note:** if a Topic has more than one subtopic, all subtopics will be selected, unless you unselect each subtopic.
6. Select the topics for your assignment. If students have started answering questions on that topic, you will be able to see the class average, as well as the number of questions answered on that topic as well.

7. Next, you will be asked to select the number of questions each student will receive on the assignment. The estimated time it should take to complete the quiz is listed as well.
8. On the final page, you will select the Grading Options as **Not Graded**, **Graded Pass/Fail**, or **Graded-Scored**. If a Custom assignment is Graded-Pass/Fail, the student will pass upon completion of the assignment. A Graded-Scored assignment will report to the gradebook for the number of points selected. You will also be able to select **Study** or **Exam** mode, as well as the assignment availability and due dates and times. Click **Assign Quiz** when complete.
