Creating a Mastery Quiz Assignment in EAQ-NG

1. To create a Mastery Assignment in Elsevier Adaptive Quizzing, select the Create Quiz Assignment button from either the top of the home page, or the top of the Assignments page.

2. On the next page, give the assignment a name, and choose the course in which this assignment will appear. If you would like your assignment to appear in more than one course, you can select multiple courses.

3. On the next screen, select Mastery Assignment from the options provided and select Next.

4. By default, the assignment will be released to all students in the course selected, however, you can choose for only individual students to receive this quiz.

5. If you have access to multiple question sets, you can choose them from the drop down at the top of the page. You can also choose the topic you would like to test on under Topic Organization. Note: if a Topic has more than one subtopic, all subtopics will be selected, unless you unselect each subtopic. It is recommended that no more than one topic be chosen for Mastery assignments.
6. You will then select the Mastery Goal for that topic. You will also be able to view the number of questions currently asked on that topic, as well as the class average on that topic if students have already started answering questions in that particular area.

7. On the final page, you will select the Grading Options as **Graded** or **Not Graded**. Mastery assignments can only report as Pass/Fail, depending whether or not the student achieved the mastery target assigned. You will also select **Quiz Options** (Study or Exam Mode), as well as the date and time the quiz will be available and due. Click **Assign Quiz** when complete.
