Evolve Link: External Evolve Link App Setup for Canvas

This guide shows you how to set up the external Evolve Link app at the account and course level, and how to set up outcomes (grade reporting). Educators at your institution can then use the Evolve Link app within courses to link in content from the Evolve site.

External App Setup at the Account Level

External apps can be set up at different levels on Canvas depending on what courses you want to have access to the Evolve Link app. Setting the app up at the account level will enable all courses in that account to have access to the app.

1. Login as an administrator into your Canvas system.
2. Click on the **Admin** tab.

3. Select the institution account at which the courses that need access to the tool are located.

4. Click on **Settings**.
5. Click the **Apps** tab.

![Apps tab](image)

6. Click the **View App Configurations** button.

![View App Configurations](image)

7. Click the **+ App** button.

![Add App](image)

8. Select the **Configuration Type** drop-down menu and set the configuration type to **By URL**.

![Select Configuration Type](image)
9. Enter the following information into the app:
   - **Name**: Evolve Link
   - **Consumer Key**: [Enter Key here]
   - **Shared Secret**: [Enter Secret here]
   - **Config URL**: http://coursewareobjects.elsevier.com/objects/tech_services/TrainingPage/Documents/evolveLink_config_canvas.xml

10. Click the **Submit** button.

### External App Setup at the Course Level

External apps can be set up at different levels on Canvas depending on what courses you want to have access to the Evolve Link app. Setting the app up at the course level will enable only that specific course to have access to the app.

**NOTE:** If your institution will be using Evolve resources and products in multiple courses and you don’t want to manually set up the Evolve Link tool in each course, it is recommended you follow the **External App Setup at the Account Level** section above.
Evolve Link: External Evolve Link App Setup for Canvas

NOTE: If you already set up the app at the account level, you do not need to do so again at the course level.

1. Login to your Canvas system.
2. Open the course into which you want to add the Evolve Link app.
3. Click on the **Settings** option.

![Settings Option]

4. Click the **Apps** tab.

![Apps Tab]

5. Click the **View App Configurations** button.

![View App Configurations Button]
6. Click the + App button.

7. Select the Configuration Type drop-down menu and set the configuration type to By URL.

8. Enter the following information into the app:
   - **Name**: Evolve Link
   - **Consumer Key**: [Enter Key here]
   - **Shared Secret**: [Enter Secret here]
   - **Config URL**: http://coursewareobjects.elsevier.com/objects/tech_services/TrainingPage/Documents/evolvelink_config_canvas.xml

**Outcomes (Grade Reporting) Setup**

**NOTE**: It is recommended that for outcomes/grade reporting from 3rd-party application (like specific Elsevier products) that you create a general administrator-level account that is used specifically to create access tokens. Using a general account, instead of a user-specific account, will safeguard against problems that would occur if a user-specific account had to be disabled or removed from your system.
1. Login with the **administrator-level** account to your Canvas system
2. Click on the **Account** tab.

3. Click on **Settings**.

4. Scroll down to **Approved Integrations** and click the **+ New Access Token** button.
5. Enter a **Purpose** (ex. Evolve Link), leave the **Expires** field blank and click the **Generate Token** button.

6. **NOTE:** When the **Access Token Details** screen appears, please **copy the token** immediately. Once you leave that page, you won’t be able to see the full token again and would have to regenerate it to get a new value.
7. Send the **access token** and **LMS URL** to Elsevier via the secure **HIGHTAIL** file-sharing service:
   a. Paste the **access token** and your **LMS URL** into a document on your computer and save that file locally.
   b. Go to **https://www.hightail.com**.
   c. Click the **SIGN IN** button.
   
   ![Hightail Sign In](image)
   
   d. Select the **DON'T HAVE AN ACCOUNT? SIGN UP** option and create a free account.
   
   ![Sign in to start sharing](image)
   
   e. Once you are signed in, click the **+ CREATE NEW** button at the top of the screen and select the **Send** option.
   
   ![Create New](image)
   
   f. Send to **integration.support@elsevier.com**.

   g. Add the subject **Canvas Outcomes Setup Details from [Your School's Name]**.
h. Attach the saved file with the access token details using the **laptop icon** (Add from My
Computer) on the right-hand side of the page.

![Drag files anywhere]

i. Click the **NEXT** button.

j. Click the **SEND** button.

8. You will receive an email within 24-48 hours from Integration Support confirming that your
information has been received, and you are now successfully set up to receive outcomes (grade
reporting) from Elsevier applications.
