EAQ: Masquerading as a Student

Introduction: The latest release of Elsevier Adaptive Quizzing (EAQ) includes masquerading as a student which is the ability to see a student’s view of EAQ. This allows the instructor to see a student’s progress including: total questions asked, current mastery level of topics covered, and all correct/incorrect answers.

Purpose: This document walks through how an instructor enters a student’s view, reviews a student’s progress, and switches between student views.

Masquerading as a Student

Entering a Student View

1. Click on completion status [0 of 3 students completed] to navigate to any assignment started by students from the EAQ home page.

   NOTE: The instructor can also get to a student’s name by clicking on the Assignments tab in the left menu.

2. Click on a student’s name [Diana Prince]. Clicking on any student’s name allows the instructor to masquerade as that student and see their view of EAQ.

Viewing as a Student

1. Click **Assignments**. This allows instructors to see all assignments from the student view.
   
   **NOTE:** While in this student view, the instructor can access all the tabs on the left side of the screen from that student’s perspective.

2. Click **Completed**. Instructor can view all **Upcoming** and **Past Due** assignments for this student.

   ![Assignments](image)

   - **Assignments**
     - Course: Elsevier Adaptive Quizzing
     - Up Next: within the next 7 days
     - Due Later: beyond 7 days from today
     - Completed

3. Click **Review Quiz**. This allows the instructor to see detailed information regarding that quiz.

   ![Completed](image)

   - **Completed**
     - **Weekly Quiz #1**
       - Topics: Cultural/Spiritual and Cultural/Spiritual
     - **Mastery Goal**
       - Cultural/Spiritual—Novice
     - **Review Quiz**

4. Click arrow next to Correct/Incorrect. Expanding these sections allows the instructor to see each question asked, the answer the student selected, as well as the rationales for each question.

5. Click Exit. This returns to the student’s Assignments page.
6. Click **Performance**. The instructor can also review each student’s **Performance** as well as their **Assignments**.

7. Click the **Topic organization** drop-down arrow. Under each topic, the instructor can view each student’s current Mastery level, number of questions asked on topic, as well as the overall percentage of questions answered correctly on that topic by that student.

**NOTE:** The instructor can also select any other topic from the drop-down menu to view a student’s performance across different taxonomies.
Switching a Student View

1. The student’s name that appears at the top of the screen indicates who’s profile the instructor is currently viewing.

2. Click the student’s name [Bruce Banner] at the top of the screen.
   a) This provides a list of all students in the class allowing the instructor to quickly switch between different student views.
   b) The instructor is now viewing the student’s, Bruce Banner, EAQ home page.

3. Click Exit. This returns to the instructor’s view.
